

who am i? who is senta aqui com o Leo?

Purpose & context

Leonardo ("Léo") is a Brazilian content creator running the brand "**Senta Aqui com o Léo**" across TikTok (@sentaaquicomoleo), Instagram (@senta.aqui.com.o.leo), and YouTube (@sentaaquicomoleo), focused on addiction recovery and chemical dependency education for Portuguese-speaking audiences. He is a certified addiction counselor with six years of personal recovery experience — a combination he views as his core differentiator and competitive moat.

Léo also works at a clinic in São Paulo several days per week and is completing a postgraduate degree in psychology, which significantly constrains his available production time (targeting ~3 hours of active content work per week). He has an active digital product (recovery guide) on Hotmart and offers paid counseling sessions via Linktree booking.

Financial goal: Reach R\$10,000/month by end of 2026.

Key competitive advantages identified:

- Only PT-BR certified counselor with significant TikTok presence
 - Combination of lived recovery experience + clinical credentials (described as irreplicable by competitors)
 - Ongoing treatment transparency — rare in Brazilian recovery content
 - Main competitor (@ficarlimpo) has strong Instagram (~341K) but zero TikTok presence
-

Current state

- TikTok is the primary platform with meaningful follower base; Instagram is early-stage; YouTube is nascent
 - Has 90+ numbered scripts in Google Drive covering addiction, recovery, codependency, family of dependents, relapse, craving, and related topics — organized sequentially with consistent naming convention
 - Has received multiple strategic deliverables from Claude: a 12-month domination roadmap, monetization guide, competitive analysis, content framework, and weekly production system — all compiled into branded PDFs
 - Revenue architecture targets R\$10K/month through counseling sessions, a group mentorship product, Hotmart sales, platform monetization programs, and brand partnerships
 - Core content problem identified: repeatability, not volume (high variance between top-performing and low-performing videos on the same account)
-

On the horizon

- Building out Instagram and YouTube from early-stage to meaningful audiences
 - Developing a group mentorship product as a future revenue pillar
 - Exploring affiliate and brand partnership monetization (segmented by platform audience income level)
 - Considering an AI agent stack (Scout, Creative Director, Strategic Manager) built on Make.com as automation backbone
 - Open question: when and how to introduce higher-ticket products as audience scales
-

Key learnings & principles

- Léo explicitly requested no sugar-coating and realistic projections only — honest assessment is a standing preference
 - Original 90-day follower targets were identified as unrealistic; revised targets were set as more credible benchmarks
 - Recovery audiences are highly responsive to product recommendations from trusted voices — but audience trust is the asset, and anything that erodes it (betting platforms, unverified supplements, MLMs, alcohol brands) is permanently off the table
 - Content should lead with lived experience and vulnerability, not academic or neuroscience framing — Léo corrected this framing early and it should not recur
 - Counterintuitive hooks designed to generate emotional validation and comment-driving controversy have been the strategic content framing approach
 - MrBeast-style emotional, high-retention content is Léo's stated creative reference point
-

Approach & patterns

- Communication style: direct, task-oriented, often writes in mixed Portuguese and English
 - Prefers professional-quality deliverables ready to use immediately without additional editing
 - Production constraint is real: one filming day per week, maximum ~8 minutes per clip in CapCut, no manual research or topic ideation
 - Wants a clear day-by-day operating structure that does not interfere with clinic and graduate school schedule
 - Has requested Claude function as a full-service strategic, creative, and financial advisor across multiple sessions — not just a single-task assistant
 - PDF generation (branded, dark-themed) has been the standard deliverable format across sessions
-

Tools & resources

- **Content creation:** CapCut Pro (owned), Descript
- **AI/research:** Claude Pro, Perplexity Pro
- **Automation:** Make.com (planned backbone for AI agent stack)
- **Repurposing/scheduling:** OpusClip, SocialBee
- **SEO/analytics:** VidIQ, TikTok Creative Center
- **Planning:** Notion
- **Sales/products:** Hotmart (active), Linktree (booking)
- **Script library:** Google Drive (90+ files, naming convention: "senta aqui com o leo [number]")
- **Email:** leofl78@gmail.com
- **PDF generation:** Python + ReportLab, output to `/mnt/user-data/outputs/`; Google Drive upload must be done manually (direct upload via MCP tools not available)
- **Gmail via MCP:** Draft creation works (HTML supported); file attachments not supported; drafts require manual check in Drafts folder
